TECHNICAL SKILLS

Tech Stack	: Git, Github, Gitlab, Docker, Terraform, GCP, AWS, Linux, VMware, kubernetes, Grafana, Jenkins
Tools	: VS code, Draw.io, MS Visual Studio
Skills	: Problem Solving, Troubleshooting, Logic Building, Communication, Project Execution
Languages	: Python, HTML, CSS, SQL

EXPERIENCE

Cloud Engineer

Searce inc

April 2024

Mumbai, Maharashtra

- Developed and maintained project of terraform automation project standardizing GCP resource deployment and reducing manual provisioning efforts.
- Worked on automation scripts for optimized, less time consuming **Pipelines**. Engineered CI/CD pipelines (Jenkins, GitLab CI) for automated build, test, and deployment, significantly decreasing deployment times, while mostly dealing with runners
- Hosted application using **GCP's Cloud Run service**.
- Working on projects mostly based on AWS to GCP migration and delivered 2 whole projects in last one year.

Associate Software Engineer (Cloud Intern)

Coditas

Oct 2023 – March 2024

Pune, Maharashtra

- Designed and developed dynamic and responsive websites using **HTML, CSS, Python, and MySQL**.
- Worked with **REST APIs** to retrieve and display data from databases.
- Enhanced expertise in industry best practices in coding and diverse deployment platforms for a more professional and scalable project.

Outcome and Learnings

Internship letter

- Gained hands-on experience in various stages of the software development lifecycle, including requirements gathering, design, coding, debugging and deployment. Maintained a strong understanding of Object-Oriented Programming (OOP) concepts.

PROJECTS

INIT Application

GCP, Python, HTML, CSS, Javascript and Git

- Developed a web-based application utilizing Python and Flask, offering users an intuitive platform for getting a code of terraform.
- using simple **Excel** get your resource code.
- Used **artifact registry and cloud run** to encapsulate the application and its dependencies, ensuring consistent deployment environments.
- Utilized **Git** for version control, maintaining a well-documented and organized codebase.

GCP-Multi-Cloud-Run-API-Gateway

[Source Code](#)

- Created and Exposed **RESTful API** using Node.js and python.
- Implemented Python APIs harmoniously orchestrated through Docker, Google Cloud Run, and an API Gateway. This project empowers you to deploy, manage, and access APIs seamlessly using Cloud Artifact Registry and Run services.
- Gained hands-on experience in cloud-native development, refining skills in a concise and interactive environment. Elevate proficiency in deploying and managing APIs in the cloud with this dynamic and skill-enhancing project.

EDUCATION

Deogiri Institute Of Engineering And Management Studies

B.Tech in Computer Science and Engineering | CGPA : 8.5

Aurangabad, Maharashtra

Sep 2019 – Aug 2023
